EXIGENCE offers plastic pallets in a lighter and more durable alternative to wooden pallet. It is common to know that the average plastic pallet's life ranges from more than 50 cycles versus 3 to 5 trips for the wooden products. Due to her strength and design, plastic pallet is more durable than wooden one. The pallet is fabricated from high-density polyethylene (HDPE), which makes pallet more durable, reusable and recyclable.

Longer Life and improved Efficiency
Consistent dimension
No loose fasteners or splinters
Rigidity and stability maximization
Environmental sound
Odorless
Rounded corner blocks to reduce forklift spearing

Four-way entry
Space saving
Washable
Hygienic
Reusable
Non-toxic

EXIGENCE is engaged in identifying needs and developing solutions for the improvement of human health and environmental sustainability.

We focus on sourcing and distributing environmental-care products that provide new and improved solutions in environment sustainability, waste prevention and reduction, life balance and environmental care.

Our work primarily involves the application of environmentally advanced products and inventions by which selected worldwide channels, with undiscovered potential are activated and brought to pursuit specific market segment in either the health or the environmental sector.

Orientation for EXIGENCE's products and know-how is key to our business. To date, various dimensions of product applications have been developed.

We truly believe that a contemporary environmental mindset will be the core competency for incorporations.

Our future and our children will count on our efforts.
